

ABSTRACT OF THE DISCLOSURE

Provided herein is a buoyant ensemble comprising a plurality of chairs having a table centrally located among the chairs. An ensemble according to the invention is especially well-suited to be placed into a recreational body of water, such as a lake or swimming pool, to provide a location at which a small group of people may congregate to relax or take advantage of having a tabletop present in the water around which they may sit and relax or play board games such as chess, checkers, backgammon, dominoes, etc.
